Apprentice Work Hours Submission Automation

Direct Student entry by web, feeding NTAS or other database

1. Apprentices register on the web.
2. They enter hours by day, edit and revise until they submit the report, or until your cut-off time.
3. Each night, apprentice hours are summed per classification and saved to your NTAS database, showing in Work Hours Detail.
 - ✓ Save staff time
 - ✓ Improve accuracy
 - ✓ Did we mention saving staff time?!

We can also make web features for Apprentices and Applicants to log in and securely view application and testing status.

For more information, call Brandon Weber at (248)910-3955.
